

Kananook Creek Ministerial Advisory Committee

Project Bulletin, February 2015

The Victorian Government is committed to improving the management of Kananook Creek to protect it from inappropriate development. The Honourable Lisa Neville MP, Minister for Environment, Climate Change and Water has established a Ministerial Advisory Committee (MAC) of independent experts to review the management arrangements for Kananook Creek and some of its immediate environs.

WHAT IS THIS REVIEW ABOUT?

The independent review of Kananook Creek will provide clear recommendations for future management arrangements for the Creek that will be best placed to address the issues impacting on the Creek.

As part of the process of identifying management and other issues associated with the creek, the MAC is undertaking a process of consultation with authorities, groups, local residents and other interested parties. The MAC is keen to hear from all those with an interest in the creek about ways in which the creek is managed and issues that need to be addressed in any future arrangements.

The Creek and its immediate environs have many roles including flood management, stormwater dispersal, active and passive recreation, and environmental, heritage and aesthetic qualities. A management approach needs to balance these sometimes competing roles and values.

A drop-in session is to be held to enable anyone with an interest in the Creek to meet the Ministerial Advisory Committee and its consultants, and discuss the issues of relevance to you. See overpage for the details.

REPORT TO THE MINISTER

What we've learnt about Kananook Creek so far....

Who currently manages Kananook Creek?

The water and land that forms the Kananook Creek Corridor is managed by a variety of government departments and authorities. The four main managers of Kananook Creek Corridor are Frankston City Council, Melbourne Water, Parks Victoria and the Department of Environment, Land, Water and Planning (DELWP).

Key Kananook Creek Values and Issues

Some of the key issues identified by the Ministerial Advisory Committee so far include:

Coordination between
Agencies

Sediment and dredging

Resources and funding

Local community group
involvement

Encroachments onto
public land

Balancing recreational,
environmental and
amenity values

The Management Plan

Flood management

Development pressure

How can I find out more and get involved?

You are invited to a drop-in session to discuss your views about the future management arrangements for the Kananook Creek with the Ministerial Advisory Committee members and their consultants.

What: Community Drop-in Session

When: 5pm-7pm, Wednesday 17th February

Where: Frankston Mechanics Institute, 1A Plowman Place, Frankston (cnr Nepean Hwy)

A RSVP is not required; there will be no formal presentation.

Feedback Form

A Feedback Form is available for anyone with an interest to provide their views on the management of Kananook Creek. The Form is attached.

For further information or more copies of the Feedback Form contact Caitlyn Pringle, Environmental/Statutory Planner at the Department of Environment, Land, Water and Planning at: enviroplan.portphillip@delwp.vic.gov.au

FEEDBACK FORM

WHAT IS YOUR MAIN INTEREST IN THE CREEK? (EG NEARBY RESIDENT, CANOEIST, BOAT RAMP USER ETC)

[illegible]

Blank handwriting practice paper with horizontal dashed lines.

WHAT DO YOU THINK IS NOT BEING MANAGED WELL IN THE CREEK CORRIDOR?

ARE THERE ANY IMPROVEMENTS TO THE MANAGEMENT OF THE CREEK CORRIDOR THAT YOU WOULD LIKE TO SUGGEST?

CONTACT DETAILS (OPTIONAL)
